Basics

Senior Software Engineer with over eight years' experience scaling mobile applications and engineering workflows across Flutter, Android, and back end technologies. Relocating to Norway, January 2027. No sponsorship required (spouse of EU citizen) Dedicated to team mentorship and technical governance, fostering an inclusive culture grounded in psychological safety, engineering excellence, and long-term growth.

Work

Jan 2025–Present **Senior Software Engineer**, *Payflex*, https://payflex.co.za
Led a Flutter re-architecture to scale in-store operations and reduce production crashes by 96% while driving cross-team technical governance and standardizing engineering workflows across the company. As of financial year-end 2026, in-store operations has grown 4x in revenue to over R1 billion. **Keywords**: Technical Leadership, Developer Experience, System Design, Flutter

Jul 2022–Dec 2024 **Intermediate Software Engineer**, *Entelect*, https://entelect.co.za/
Intermediate software engineer specializing in mobile app development with experience in the health and finance industries. Worked closely with architecture teams and leadership. **Keywords**: Flutter, Native Android, Developer Experience, Technical Documentation, Leadership

Aug 2021–Jun 2022 **Software Engineer**, *Entelect*
Modernized the Health module by migrating legacy Java to Kotlin utilising MVI. Worked on the Java backend-for-frontend and standardized web-based content integration with the design team to ensure a unified user interface. **Keywords**: Native Android, Spring, Microservices, Interdisciplinary Collaboration, Kotlin

Oct 2019–Jul 2021 **Software Developer**, *Vectra Business Technologies*, https://vectra.co.za/
Full-stack Software Developer specialising in creating mobile point-of-sale solutions and business analytics tools. **Keywords**: Ionic Framework, Angular, Node.js

Feb 2018–Oct 2019 **Software Developer**, *Warp Development*, https://warpdevelopment.com/
Front-end Software Developer building Hybrid Apps for the health and finance indistries. Most notably the My Pregnancy Journey app winning accolades at the WHO Africa Innovation Challenge and the MTN App of the Year award for the 'Women in STEM' category. **Keywords**: Ionic Framework, Mobile Application Development, Adobe XD

Awards

Dec 2021 **Entelect**, *To Bodly Grow*

An award for embodying the value of 'Growth isn't optional'. This recognition highlights my commitment to continually improving and growing. As well as my dedication to learning, teaching and assisting other in their growth journey. I was commended for quickly upskilling in a new tech stack, deliverying solid solution and actively contributin to my teams success. I embrace the team mantra of 'Always be Crushing'.

Oct 2019 **MTN**, *App of the Year*

Africa has the highest rate of adolescent pregnancies, HIV infections and birth deaths due to a lack of information. A factor that affects the health, education and earning potential of millions of African women. I assisted in creating an education pregnancy app that is focused on Africa and the unique challenges that her women face.

Apr 2019 **Warp Development**, *Rookie Rockstar*

Awarded to the most impactful new hire across all seniority levels.

Skills

Leadership	Beginner	**Keywords**: Empathy, Listening, Communication
